QUALITY PARTS, QUALITY PRICES!

Worthington Ag Parts is your global source for combine parts, cotton picker parts, tractor parts and used farm equipment. You can order the farm equipment or parts you need online and have your order shipped anywhere in the world. We have the right quality new, rebuilt, used and salvaged ag parts at the right price.

Worthington Ag Parts has been serving the agricultural community for over 54 years. We began as a supplier of farm tractor parts and have also become the leader in farm implements, used tractor parts, tractor salvage, combine parts (such as grain augers), and farm equipment. We purchase over 4-million dollars of used parts each year to ensure our inventory is the broadest in the industry. From John Deere tractor parts to Case tractor parts to International tractor parts, our extensive supply of parts will satisfy your needs. With our locations in North America and Australia combined, you have nearby access to our tractor salvage yards and equipment supplies, which are shipped to customers across the world.

All our quality parts, whether tractor parts or combine parts, are checked, cleaned and repaired as necessary to make sure each part sold is ready for service. Our goal is to provide outstanding value and service to our customers. All of our used parts are quality checked before they can be sold and are backed with a one-year limited warranty - 30 days no question asked return policy. Most of our new parts are priced at 70% of dealer price. We also carry a line of diesel engines, rebuilt starters, and hydraulic pumps. Whether you are getting Ford tractor parts or antique tractor parts for your Farmall tractor, you can be satisfied knowing that the farm equipment you purchase from Worthington Ag Parts is of the best quality.

capello

Designing and manufacturing harvest equipment **SINCE 1965!**

QUASAR

The Capello QUASAR corn head is the product of years of leading-edge engineering refinement and precision craftsmanship. The trouble-free Quasar corn headers, known for low maintenance and high-efficiency performance, have expertly harvested millions of acres over the years in more than 80 countries around the globe. Available in nearly any row or spacing configuration possible, both rigid and folding, the Quasar just makes sense. Comes with a 2 year Warranty.

SPARTAN

Battle-Proven in the toughest conditions. Any row spacing, any direction, there is no stopping the Gladiator corn head from conquering your fields. The Gladiator includes Capello's signature chopping feature which has been proven to dramatically improve corn stalk residue breakdown which translates to increased yields and increased profits. Same trusted Capello craftsmanship, adapted to conquer new age planting styles. Comes with a 2 year warranty.

Designed to fit nearly any self-propelled forage harvester in the world, the Capello SPARTAN is the perfect solution for direct-cut feed crops (greenchop). The Spartan is designed with a large, floating feed auger and 2-speed main drive gearbox to ensure regular and continuous crop flow at high ground speeds. With low maintenance requirements and replaceable wear surfaces, the Spartan is designed with the custom operator in mind. Comes with a 1 year warranty.

Helianthus

A platform header designed to be used independent of row spacings, the Capello HELIANTHUS harvests any sunflower crop planted in any arrangement, including solid-seed. With the distinctive feature of a hydraulic reel drive, the operator can adjust both reel height and speed from the cab, for optimum product flow even in highly varied crop heights, yields and ground speeds. The Helianthus uses a long, narrow crop pan in front of the cutter bar to reduce shelling losses to near zero in any conditions. Comes with a 2 year warranty.

Lumens and The Benefits of LED

In simple terms, Lumens are a measure of the total amount of visible light from a lamp or light source. The higher the lumen rating the “brighter” the lamp will appear.

When referring to lumens associated to LED Lights there are two types of lumens. There is Raw Lumens and Effective Lumens. The Raw Lumen figure is the number of LEDs in a light multiplied by its maximum output rating. Effective lumens, on the other hand, take into consideration the outside factors, giving you a more realistic measure of light output. When we use the term lumen, we are referring to the Effective Lumens.

Benefits of LED Lights

- 01 Versatile and Easy to Install
- 02 More Light, Less Energy
- 03 Brighter Light
- 04 Long Lasting
- 05 No Bulbs

Aftermarket Major Overhaul Kits for Many Applications

ENGINE OVERHAUL KITS

QUALITY PARTS WHEN YOU NEED THEM

- **Cylinder Kits**
- **Engine Bearings (Rod, Main & Thrust)**
- **Overhaul Gaskets**
- **Oil Seals**
- **Piston Pin Bushings**
- **Connecting Rod Capscrews**
- **Camshaft Bearings (when applicable)**
- **Camshaft Plug (when applicable)**
- **Balancer Shaft Bushings (when applicable)**

HARD ANODIZED CROWN

Hard Anodizing strengthens the surface of the piston crown, offering additional protection against corrosion & wear. It also creates a thermal barrier for the piston, reducing fatigue by keeping temperatures lower.

PHOSPHATE COATED SKIRT

Phosphate Coating the piston skirt increases hardness & wear resistance, and provides a lubricant film which is especially beneficial during start-up or break-in of engines to protect against galling & micro-welding.

Blade Upgrades

Benefits of Redekop Blades

Better Cut

Redekop blades are self-sharpening, providing the best possible straw-cutting action, increasing the chop quality of your combine.

Long Life

All upgrade blades are coated with high-quality carbide which has been optimally placed to provide the longest life and sharpest cut. Redekop's straight blades are reversible to give you twice the life.

Efficient Power Usage

Redekop carbide coated self-sharpening blades slice through the straw more efficiently using less power than winged or blunt non-carbide coated blades.

Replacement Blades

Redekop also offers high-quality Replacement Blades to fit your standard factory chopper and stationary knife bar.

REDEKOP™

Crop Residue Management

Seedbed Preparation Starts at Harvest

Fast, uniform germination in the spring starts with seedbed preparation at harvest. Uniform distribution of straw and chaff (crop residue) across the width of the cutterbar is a critical component of any seeding system -- especially reduced or no-till systems. Failure to manage crop residue properly can lead to poor seeding performance, such as:

*hair-pinning
plugging*

*poor and uneven emergence
cold and wet soils under mats of residue*

toxic chaff-effects on seedlings

Yet as combine capacity gets larger and cutting widths wider, most factory equipped combines are incapable of spreading crop residue uniformly across the width of the cutterbar.

Seedbed tillage Isn't the answer

Managing crop residue after harvest can often make the problem worse. Heavy harrowing can leave bunches of straw in the field that impedes seed placement and it also does not spread chaff. And many direct seeders believe that harrowing or cultivating the land once is worse than no tillage at all as it incorporates weed seeds into the soil and loosens the stubble, which plugs up the seeding tool and increases hair-pinning.
